- INIT keypad and LCD.
- Make a simple calculator.
- That takes only take a number between (0,9).
- it just a do the basic operation (+, -, *, /) depend on the user input.

**Note that**:

- You have to upload your project and your proteus simulation file
- You need to upload max 1 min video that presents your program working in proteus.
- You have to follow the modular programing concept that you have taken during the c sessions
